Bulgarian Family Planning and Sexual Health Association is a non-governmental organization in public benefit founded in 1992. BFPA works for the promotion and provision of services in the field of family planning, reproductive health and gender issues, assuring access to healthcare services for vulnerable communities, prevention of sexually transmitted infections and HIV. The association activities include medical service provision, trainings in the field of sexual and reproductive health, provision of comprehensive health and sexuality education, organization and implementation of health related campaigns, and conducting of researches. The main beneficiaries of BFPA are mainstream young people and young people in institutions, young people with learning disabilities, people with difficult access to health, educational and social services, including vulnerable and marginalized communities such as Roma, people and staff in penitentiary institutions. BFPA has national coverage and maintains 5 centers in the country.
